

**CRYSTAL PALACE.**  
The opening of the exhibition at the New York Crystal Palace was celebrated on Thursday last, the 14th instant. The occasion was honored by the presence of the President and his Cabinet, and by other distinguished officers of the government, and of the Army and Navy. The crowd assembled on the occasion is said to have been larger than any ever known in the city.

**Editorial Penning.**

**GREENVILLE RAILROAD.**

As the annual meeting of the stockholders of this company, THOMAS C. PERKIN, Esq., of Abbeville, was elected President, without opposition. The old board of Directors, with perhaps a single exception, were chosen.

**NEW JUDICIAL DISTRICT.**

A meeting of the citizens of the several Districts was held on the 2nd inst., in Kershaw, for the purpose of taking into consideration the expediency of establishing a new Judicial District in this State, to be composed of a part of Kershaw, Chesterfield, Darlington, and Sumter. A mass meeting will also be held in September for the same purpose.

**TOBACCO CROP.**

Accounts from Virginia state that the tobacco plant has suffered so much from drought, that not more than a half crop will be gathered. The yield of last season was below the average; which fact, coupled with the failure of the present year, must raise the value to an enormous price. Men who are likely enough to eat such stuff may reasonably expect to "pay the piper"—and as for snuff, rejoice oh! dogwood.

**SEAFARING TELEGRAPH.**

The ceremony of establishing a telegraphic communication between the British House of Parliament and Brussels, took place on the 19th inst. The London News says that the experiment was in all respects most successful, and gentlemen engaged in the houses of legislation in London may readily employ their moments, if they have any, in carrying on a dialogue with their friends or contemporary statesmen in Brussels.

**THE NEW YORK DAY BOOK.**

The New York Day Book has lost his skills, and is in despair. Hear him: "Does anybody expect an editor to write editorials during these warm days? We hope no one entertains such an absurd idea, as that he will sit on a stool when he is sure of bursting his boiler if he does! There—blotted out with sweat! Oh, shades of departed editors help us to 'keep cool'!" That's an idea, certain. Who expects the ghost of a dead editor, fresh from the warmest climate, to stand the sunbath, rather than take the benefit of such shades as that!

**CANVASS IN BUNCOMBE.**

Quite a spirited contest is going on in the Western District of North Carolina, between Clingman, State Rights, and Galther, an old fashioned, broken-winded whig. Galther was a supporter of Scott in the last Presidential canvass, and is as near being a Free-Soiler as a Southern man can be with safety. Col. Clingman is a noble specimen of the disinterested politician, a man who is independent of party and party influences, when they swerve from the right, and altogether well deserving the confidence of any constituency in any position. We hope he will be re-elected.

**EXECUTION OF THE NEGRO CHARLES.**

The Carolina Spartan informs us, that the negro Charles, the murderer of the wagoner, Haffner, was executed at Cross Anchor, on Friday the 7th inst. A striking circumstance in this case is, that the wagoner sold the liquor to the negro, under the influence of which he committed the fatal deed. Truly, "the way of the transgressor is hard." The Spartan complains, and justly too, of the inroads made upon the peace and welfare of the citizens of the up-country, by these vile, and unprincipled whiskey-peddlers from North Carolina, who sell their stuff to negroes and white men indiscriminately, and sow the seeds of murder and insurrection in our country. Much more such villains to be dreaded than the fanatics of the north, who scatter fire brands into our midst to corrupt and destroy our peculiar institutions. And we, therefore, heartily second the wish that such craft be kept from our borders, by a stringent legal prohibition.

**KING'S MOUNTAIN RAILROAD.**

At the annual meeting of the stockholders of this company the following gentlemen were elected officers for the present year: Col. Wm. Wright, President; John S. Moore, George Steele, Col. W. C. Beatty, Dr. Samuel Wright, Dr. James M. Lowry, Samuel Rainey, Sr., F. H. Simril, and John Webber, Directors.

Resolutions were passed declaring it to be the opinion of the meeting, that a plank road connection between Yorkville and Shelby should be made, and that the people of York should construct the road to the North Carolina line; and authorizing the Directors of the Road to subscribe \$5000, to the accomplishment of this end. The annual meetings of the Company will be held hereafter on the second Wednesday in September.

**DIPLOMATIC.**

A diplomatic convention is to be held in Washington in a few days, to which Messrs. Buchanan & Soule will give attendance, before their departure for Europe. It is supposed to be for the purpose of marking a line of diplomatic policy in Europe, which is to be pursued, under certain contingencies. This is a good idea, and should be followed up hereafter by such measures as often as possible; so as to give a uniform character to our foreign intercourse.

If we are to believe the correspondents of the Journal of Commerce, no timid, time-serving policy will be pursued by the administration in international affairs; but rather the strong arm of the Government will be extended with vigor and promptitude for the protection of American citizens and American rights abroad. It is stated that important and decisive steps have been taken in relation to the Fishery question, Cuba, the Sandwich Islands, Central America, Mexico, China, and other important subjects. And furthermore, that our ministers will hereafter be required to doff their gilt buttons and feathers, and appear before thrones and powers plain and undressed and like republicans—American citizens as they are. Good.

**THE MOCKING BIRD.**

Since Miss Brennan's concert in Chester, we have noticed with pleasure the reports of a still more flattering success elsewhere. The concert in Charlotte was well attended, and according to the *Democrat*, very successful. A crowded house of about five hundred persons, welcomed her in Greenville, and the *Patriot* is perfectly enthusiastic in praise of the performance and the good taste of the audience. The concert in Anderson was given on the day of the meeting of the stockholders of the Greenville Railroad, and, it is said, was attended by the largest audience ever gathered together in those parts.

Miss Brennan will sing in Charleston shortly, and after spending the season North, will return and give a series of concerts in the fall, preparatory to her visit to Europe in the Spring. She carries with her the earnest wishes of the lovers of song and of the admirers of the beautiful and good.

**EDWARD EVERETT.**

Edward Everett is a great man, notwithstanding the often expressed opinion of those who are apt to see a mountain in a mole-hill, and are as blind to the virtues of others as they are headless of their own faults. While the remarkable versatility of his genius and character has rendered him fit to fulfill the varied duties of the widely different stations to which he has been called, he has yet discharged these trusts with a success as brilliant as that usually accorded to one-ided men. However, he is an enemy to those cherished principles which form the bulwark of the South, and while we admire his greatness, we watch with anxiety the progress of his splendid career.

"This God-like Second" delivered a speech, on the 4th, before an assembly of the citizens of Boston. It is a masterly effort, replete with many and truly eloquent sentiments—the only fault being in the ugly length of many sentences. The following extract is one of the longest and best, and is a favorable specimen of the power he brings to bear upon his productions.

"The sacred tie of family, which, reaching backward and forward, binds the generations of men together, and draws out the plaintive music of our being from the solemn alternation of cradle and grave—the black and white keys of life's harp—(emotion)—the magical power of language, which puts spirit in communion with spirit in distant periods and climes; the grand sympathies of country which lead the Greeks of the present day to talk of 'the victory which we gained over the barbarians at Marathon'—(emotion)—the mystic tissue of race, woven far back in the dark chambers of the past, and which, after the vicissitudes and migrations of centuries, wraps up great nations in its broad mantle—(cheer)—these significant expressions which carry with them the sense of the past—Forefather, Father, Child, Posterity, Native Land, these all teach us not blindly to worship, but duly to honor the past; to study the lessons of experience, to see the high consequences which are beyond the reach of decompensation. The registry of deaths was consulted, and no mention of the body was found."

...The attention of men of science, in Paris, has been drawn to an extraordinary discovery made in a neighboring department. A grave digger, in throwing up some earth, came upon a body in a state of perfect preservation. On examination it proved to be that of an individual buried thirty-seven years ago. He had died from the effects of the bite of a mad dog, and the coffin and the earth had fallen to dust, but the body remained intact. This is the third exhumation made within twenty years of bodies of the victims of hydrophobia, under similar circumstances; and it would really seem that they are beyond the reach of decomposition. The registry of deaths was consulted, and no mention of the body was found."

Business Cards. Holloway's Ointment.

A most remarkable cure of Ross Logan, after 4 years' suffering.

Extract of a letter from Mr. William Graham, of  
St. Mary's rectory, Weymouth, dated May 16th, 1890,  
to Professor Hottelwar:

"SIR: At the age of 38 my wife (who is now 51)  
caught violent cold, which settled in her lungs, and  
ever since that time she has been more or less per-  
manently invalided. Her agonies were distressing and  
for months together she had desisted entirely of  
food and drink. Every remedy was tried, but without  
the least success. I am glad to hear that you have

several years the status of the legs was terrible. I lost often my equilibrium, and walked for two hours with the Ointment; and, as this treatment was entirely new, already had proved useless, the constant use of it. So some months later, one day, and strange to relate, I was in good health. The legs are now free, without pain or ache, and have stood sound and undisturbed. Could you have witnessed the suffering of a girl suffering from the same disease, which I have said, and seen her walk so well, you would have been horrified in looking upon the means of so great alleviation, the suffering of a fellow creature.

—Signed, — WILHELM GAHN.

1 person 70 years of age, caused a bad type of  
thirty years standing.

Copy of a letter from Mr. William Abner, Editor of  
Gas Press, at Kansas, to the Huddellsville, dated  
May 31st, 1951.

To Professor Helowitz.

Sir, I suffered for a period of thirty years from  
bad leg, the result of two or three different accidents.  
Gas Works, accompanied by several symptoms  
had recourse to a variety of medical advice, without  
deriving any benefit, and was even told that the

myself a hundred years ago, and I was told by my Father, Clement, how difficult a completion it is to make a building for who had not money to erect the best.

Signed, **WILLIAM ARBS.**

The truth of this statement can be verified by Mr. W. P. England, Chemist, 13 Market street, Huddersfield.

*A Dreadful Bad Breast cured in one month.*

Extract of a letter from Mr. Frederick Turner of Peshurst, Kent, dated December 13, 1860.

To Professor Holloway.

DEAR SIR: My wife had suffered from that Pesant  
for more than six months, and during the whole period  
had the best medical attendance, but all to no purpose.  
Having before healed an awful wound in my own leg  
by the use of the celebrated medicine,  
I used your Pills and Ointment, and there-  
of I found to be more, and fortunate it was I did so for  
less than a month. I perceive your Pills effected a  
cure, that various other branches of my family have  
derived from their use is really astonishing. I now  
strongly recommend them to all my friends.

Signed, FREDERICK TURNER.

SEN at the establishment of Professor HDRIE WAY, 24 Strand, near Temple Bar, London, and all respectable Druggists and Dealers in Medicine.

throughout the British Empire, and of those of the United States, in Pots of 37 cents, 57 cents, and 81 cents each. Wholesale by the principal Drug Houses in the Union, and by Messrs. A. E. & D. SANBORN, New York, and P. McCORMACK, Charleston.

There is a considerable saving by testing in large lots.

N. B. Directions for the guidance of customers are enclosed as usual in each box.

**Dr. Guyot's Improved Extract**

**Yellow Dock and Sarsaparilla**

It now puts up in the largest glass bottles, and it is acknowledged to be the best medicine ever made and certified by the Western Dispensary Association as original copies of which are in the possession of its Proprietor. Remember, there is only TRUE and ORIGINAL article.

The Medicine, when used according to directions,

STEARNS' STEARNS' STEARNS'

**Will Cure All Venereal Pains**  
 Scrofula or Kings Evil, Cancer, Ulcers, Swelling of the Skin, Erysipelas, Chronic Sore Eyes, Bad Warts or Tetter, Scald Head, Rheumatism, Pains in the Bones and Joints, Old Sores and Ulcers, Swelling of the Glands, Syphilis, Dysentery, Salt Rheum, Diseases of Throat, of the Lungs, of the Arteries, Diseases arising from the use of Mercury, Pain in the Side and Shoulders, General Debility, Dropsy, Lumbago, Jaundice and Colic.

**The Best Female Medicine Known.**  
The peculiar malarial to which females are subject commonly produces great bodily exhaustion, accompanied by a depressed and often gloomy state of mind. As the system declines, the tendency is to a loss of nervous power, and the mind is gradually robbed of the energy of the mind and disturbed the equilibrium of the temper. Every candid woman who has experienced female complaints will admit this to be the sad truth. Now, to obtain relief it is only necessary to stop the tendency to depletion and debility. This done by resuming that fountain of life, the blood.

the BLOOD, and no medicine accomplishing this valuable result so speedily and so safely as Dr. Guy's Improved Extract of Yellow Dock and Sarsaparilla. Ladies of pale complexion, and of nervous habit, and such as are debilitated by those ailments which females are liable to, are restored, by the use of a bottle or two, to bloom and to vigor.

*Sorefula and Caper cured by Dr. Guy's Extract of Yellow Dock and Sarsaparilla.*

RUTLEDGE, Granger County, Tenn.  
April 27, 1862.

J. D. DEARY, Esq., Chesham, Bucks., writes: "I have been giving me great satisfaction to add the extract of 'The Guy's Extract of Valerian' to my 'Sarsaparilla,' to that of the numerous cases of the special persons who have been benefited by the medicine."

My wife has been making use of the extract of Valerian for some time with great benefit. She has found its origin in the blood, and she has been unable to get rid of it. With the extract of Valerian she was cured of the same. The doctor who was the physician in the second century, without deriving any material aid from his prescriptions.

Upon the recommendation of Dr. C. C. Cook, one of the  
Physicians, who had seen the medicine used with great  
effect, I obtained of your Agents here, Messrs. J. H.  
McKinnell and J. H. McKinnell, one bottle of S. D. Gorman's Extract  
of Yellow Dock and Sassafras, and a small  
bottle of S. D. Gorman's Compound, which I have  
found relief from that, both the Physical and  
Mental, which has been taken with great benefit  
for I am pleased to say that I am now  
entirely recovered from my illness, and  
Serravallo and Camporossi are now at hand and well.  
Accept my grateful thanks,  
MICHAEL GOLDMAN.

Extract of a letter from a gentleman, Merchant  
Philadelphia, Livingston and Co., Wash. D. C.  
Baltimore, Md.

Mr. John B. Park—Dear Sir—I have  
low fever, and have been suffering from  
aching sides in my chest for some time. I  
have informed me that one of his children  
suffered from a very severe cold, and  
of only one bottle. He had been almost dead  
that had been so long in bed, but all of a sudden  
the child continued to grow. The mother said  
all healed up and the child appeared well, without

justly ascribed to the use of the Yellow Root and the  
aparilla.

STOKE, N. Y. Times Herald, N. A. 1904

**Females, Read the Following**

REMARKS.
